

Hinweis: der Workshop wird in Englischer Sprache stattfinden!

Intended learning Outcomes

Participants will be able to

1. explain key-features of problem-based learning (PBL).
2. identify essential elements for successful implementation of PBL.
3. experiment with PBL-design.
4. reflect on what they want to achieve in their future educational practice.

Content

During the workshop participants will get acquainted with theoretical aspects and practical techniques for problem-based learning (PBL). In small teams, participants will reflect on their current educational activities and experiment with designing PBL education. An important part of the workshop is devoted to applying PBL learning principles to the participants' educational activities or related responsibilities. The workshop will furthermore focus on preconditions for feasible implementation of PBL activities in the institute's educational processes.

Speaker

Walter Jansen

Target group

Research assistants, teaching assistants and teaching staff.

Dates
