**Date/Time/Location:** still to be clarified – if available, the module will take place in a compact form in November 2019  
**Type:** Seminar and practical course  
**Language:** English

**Description:** This course is designed to provide you with opportunities to further your understanding of skill acquisition, through the use of a constraints-led approach. A constraints-led approach is multi-dimensional, focussing on the learner, their context and the skill involved. It integrates and explores the physical, emotional and social dimensions of acquiring skills in order to meet a learner’s needs. This course will help you to understand your role in shaping the learning of others. The focus is on you as the learner, developing your knowledge and skills through experiencing a variety of learning activities. This will allow you to explore and manipulate a range of different learning tasks and situations leading to understanding the skill learning of others. You will be challenged to look at skill acquisition through the eyes of the learner.

**Credit Points:** 2.5  
**Prerequisites:** Good English language skills
