

Module handbook

M.A. International Sport Development and Politics [MA DEV]

Valid for first-year students: Winterterm 2016/17 onward

**Deutsche
Sporthochschule Köln**
German Sport University Cologne

The **qualification objectives** of the M.A. „International Sport Development and Politics“ can be summarized in the five categories **academic orientation, vocation field orientation, internationality, diversity and key competences**.

Academic orientation

The course aims at teaching a wide range of approaches of different disciplines. Concepts of social sciences, economics and humanities are taught as an essential basis for further studies in the field of sport science. Furthermore, knowledge of quantitative as well as qualitative methods is conveyed in order to enable students to acquire and analyse basic knowledge in the key subject areas themselves. Based on the three dimensions polity (form), politics (process) and policy (content), the Master's course conveys theory-based systematic and analytic approaches to political and social realities of sports, qualitative methods of empirical social research and hermeneutic processes. In the first year, through the close connection to the course "Sport Management", students are able to acquire economic knowledge and management skills as well as skills in quantitative research and statistics. Possible cooperation between the two Master's courses include shared mandatory as well as complementary lectures by guests.

Vocation field orientation

While the focus of the first two semesters is mainly the acquisition of knowledge, the aim of the third and fourth semester is to deepen the students' understanding of these contents. Research and practical seminars and an internship are included to enable students to apply the theoretical background in national and international projects. Learning outcomes include the ability to become familiar with current developments in the sport sector quickly and to contribute to the theoretical and practical development of the area. The international course enables students to act competently in international research projects and professions. Thus, graduates will have the opportunity to work in ambitious positions in sports clubs, associations, NGOs and in management as well as in the sports science area at universities or other research facilities. The Master's programme is also a great basis for doctoral studies.

Internationality

With a European and international approach, the Master's programme is able to show the complex system of structures in sport that has developed in the last few decades. The programme conveys essential knowledge about sport systems, structures and development with examples from different countries. Learning outcomes in this context include achieving an understanding of the supranational European multilevel-system as well as specific conditions for sport in the US, Asia and Africa. Special attention will be paid to transnational cooperation in sport. Furthermore, there will be exchanges and cooperation with international universities.

Diversity

Based on the German Sport University's guiding principle of diversity, the productive integration of diversity will be another learning outcome of the Master's programme. Diversity is to be understood from three perspectives. First, special attention is paid to a mix of German and international students in the course. Second, a wide range of subjects in the area of social sciences is taught. Third, to a great extent contents of the course will be dedicated to issues like gender, age, religion, sexual orientation and disabilities with regard to sport. Standards of humanities and social sciences will be applied through a critical and reflective approach that will be practiced in every lecture.

Key competences

The focus on interaction in the Master's programme will enable students to gain the following key competences: project-related methodical expertise (e.g. the planning and implementation of projects), data-based evaluation competence (e.g. the critical verification of sources, evaluations), reflective competence (e.g. the analysis of social structures and possibilities of participation), communication competences (e.g. capacity for teamwork), intercultural competence (e.g. recognition of inclusion or exclusion). Language skills are another important learning outcome. All courses of the programme are taught in English and also the final thesis is written in English. This will enable students to practice the language and get familiar with its application to a specific context. The German Sport University plans to use and further develop existing cooperation with international universities such as the Universities of Loughborough and Brighton in Great Britain, the University of Leuven in Belgium, the Universities in Beijing and Shanghai in China in the context of sport, and, in the area

of development, the Universities of Cape Town and Johannesburg in South Africa and Porto Alegre and Belo Horizonte in Brazil.

Module Description

Deutsche
Sporthochschule Köln
German Sport University Cologne

Module:	Fundamentals and Topics of Sport Development
Degree program:	M.A. International Sport Development and Politics [MA DEV]
Valid for first-year students:	Winter term 2016/17 onward

German module title	Grundlagen und Themenfelder der Sportentwicklung
Abbreviation	DEV1
Subject related semester / Duration	1. SRS / 1
Total Workload/ Total ECTS points	210 h / 7
Courses of the module Title Semester hours per week / Contact time / Self-study/ Semester of study / Type of class / Language of Instruction / Mandatory attendance	a) Historical aspects 2 SHW / 30 h / 40 h / 1. SRS / LEC / English / no b) Political aspects 2 SHW / 30 h / 40 h / 1. SRS / LEC / English / no c) Documents Material Based Research in the Humanities 2 SHW / 30 h / 40 h / 1. SRS / SE / English / no
Key competencies	<ul style="list-style-type: none"> To gain a general overview on the contents of the Master Programme To acquire disciplinary and methodological competencies To obtain an academic working approach
Central contents	<ul style="list-style-type: none"> Introduction to historical processes in sport Introduction to political structures in sport Introduction to qualitative methods
Learning Outcome	<ul style="list-style-type: none"> General understanding of history and political science as sport related academic disciplines General understanding of different disciplinary approaches to sport development General understanding of concepts theories and methods on sport development General understanding of differences and linkages between the different disciplinary approaches
Teaching and Learning Methods	Lectures, seminar, independent learning
Recommended Literature	Will be communicated at the beginning of each lecture/seminar; for example: Barrie Houlihan et al. (eds.): Routledge Handbook of Sports Development, London 2013.
Type of module (compulsory/elective)	Compulsory
Prerequisites	Cf. Overview Prerequisites
Intermediate Assessments	Intermediate assignments will be considered. Exact details will be given for each seminar in the first session at the semester's start
Assessment / extent / share of the module grade	Written exam on all three lectures/seminars
Weight of module	(100%)
Module Commissioner	Cf. Overview Module Commissioner

Subject to modifications

Module:

Measurement and Evaluation (=SMA 2)

Degree program:

M.A. International Sport Development and Politics [MA DEV]

Valid for first-year students:

Winter term 2016/17 onward

German module title	Methodik und Evaluation
Abbreviation	DEV2 (=SMA2)
Subject related semester / Duration	1. SRS / 1
Total Workload / Total ECTS points	420 h / 14
Courses of the module Title Semester hours per week / Contact time / Self-study / Semester of study / Type of class / Language of Instruction / Mandatory attendance	<p>a) Research Methods and Evaluation 2 SHW / 30 h / 120 h / 1.
